

Since the founding of Equipsa Enterprises, Inc. in 1992, our company has specialized in providing equipment for field instrumentation. Our quality policy has been to reach and keep customers satisfied by constant and continuous presence of our highly certified engineers by the manufacturers of the products we represent as: raw materials, CPVC, Nickel, Alloy 600, Alloy 200 piping. We specialize in corrosive and chemical materials used in mining, chemical, automotive and heavy machinery.

The experience gained in over 12 years, has served to consolidate our position as a leading, reliable integrated services field instrumentation. The reliability and quality of our products has led to the establishment of contracts for equipment supply macros with companies in various markets, both in state enterprises and in the oil industry and private companies.

We hope that in our newly renovated website, you can find products that will help you in your needs.

Attentively
Vicky Isaza
