Worldwide Leadership in Liquid Level Monitoring

Penberthy Product Sales Announcement Canada

With manufacturing roots dating back over a century, Tyco Flow Control – Prophetstown, better known by its Penberthy brand name has long been recognized as a global leader in design and manufacture of high quality level instrumentation for process industries. Through our pursuit of excellence in product quality, customer service and on-time deliveries, we are known for providing superior products at competitive prices. From our beginning in 1886 with the boiler feedwater injector through present-day ISO 9001 certification, leading edge technology and personnel, Penberthy has unwavering in its ability to anticipate customer needs and to solve problems.

With the new millennium, we've intensified our commitment

With manufacturing roots dating back over a century, Tyco Flow Control – Prophetstown, better known by its Penberthy brand name has long been recognized as a global leader in design and manufacture of high quality level instrumentation for process industries.
